## 2. Special Items

According to statistical data on foreigners visiting Japan publicized by the Japan National Tourism Organization (JNTO), the number of foreigners visiting Japan in the month of October 2025 reached 3,896,300 and increased by 17.6% compared to the same month in the preceding year, marking a historical high for the month of October. The cumulative total for 2025 exceeded 35.54 million.

In this context, the operating results (actual) of the hotels held by SAR for the month of October were as described above. With the beginning of the autumn foliage season, the hotels captured demand from both domestic and inbound tourists, as well as domestic demand driven by concerts and various events, continuing from the previous month. Except for certain hotels, overall performance remained strong.

Meanwhile, recent parliamentary statements concerning a potential Taiwan contingency have triggered reports that the Chinese government is calling on its citizens to refrain from traveling to Japan. Among the hotels held by SAR, those with a relatively high proportion of guests from China are in the Tokyo and Osaka areas. However, the share of Chinese guests was 15.5% of total guests across the 16 hotels operated by Polaris (see Note) in October 2025, and the impact at this stage remains limited. Although it will be necessary to closely monitor booking trends for the upcoming Chinese New Year holiday period in February next year, one of China's major holiday seasons, SAR had already shifted its promotional strategy and initiated efforts to diversify its customer mix with the aim of expanding sales channels, prior to these reports.
